National Seminar is focused on Innovative Pedagogical Approaches and Effective Teaching Learning to Promote NEP-2020. This seminar is organizing by Kumavathi College of Education, Sakaripura. In teaching new technologies are adapting to bring change in existing system for fulfillment of predetermined educational objectives. Earlier books were only source of instruction, individualized learning and individualized teaching. Today the type have expanded to include diversified modes like text books, Reference books, workbooks, magazines, booklets, comics, programmed books, modules, PLM, motion pictures, photographic slides, Programmed Pen drives, blended learning technologies, Online Teaching, films, audio discs, charts, Models, photographs, drawings, simulation games, radio, television, e-learning, interactive white board, flip class, social networking, Constructive Learning, Discovery Learning, Mobile learning, Video Learning, Web based instructions, Computer aided interactive learning etc. It has been proved through research studies by individuals and institutions that information and communication technology (ICT) can make the teaching learning process more effective and efficient if utilized intelligently. In higher education and in school education mostly lecture method is used by teachers in classroom. Although, Lecture Method is useful in completing large content in less time but there are many limitations of this method that is, teacher is always dominating in class and students become passive listener only, class becomes teacher centred, only a few students are interacting with teacher in class, many students could not clear their doubts in classroom. There are some other teaching methods are also have been using in higher education like Constructive Methods, Demonstration, Discussion, Story Telling, Role Play, Visit, Project, Laboratory, Assignment, Quiz, Problem Solving, Dialogue, Question Answer, Seminar and Conference method, Lecture with Power Point Presentations, Flip Class, Lecture with Audio and Video presentations, Online Teaching etc. but only limited number of teachers and institutions are using these methods regularly. A new paradigm of teaching and learning is needed to increase the pupil's active participation, perception and cognitive development. The transfer of textual learning contents to visual learning content. This transition is more effective in the learning through innovative pedagogy and effective Teaching Learning.

Call for Papers
