ABOUT THE WORKSHOP

Teaching is generally considered as a blend of knowledge and interpersonal skills. For a classroom teacher, it is very important to possess communication skills along with the mastery on the subject. Quality teaching is a beautiful amalgamation of communication skills and subject the mastery. Without any one of the either teaching loses its quality and affects at the reception level of the students. This in turn leads to low achievement, loss of interest, change of attitude among the students. Hence it is inevitable for the teachers to be aware of the importance of communication skills in teaching. Further the teacher educators of colleges of education are facing a tough task in training their student-teachers in communication skills as it needs additional facilities and time. The school sector is expecting a lot from the products of colleges of education in respect of communication skills along with teaching skills. Thus there is a need for the colleges of education to develop skilled staff so as to train the student teachers in communication skills that too in English communication. It is necessary to realize that all students have different levels of strengths and weaknesses. It is only through communication skills that a teacher can introduce creative and effective solutions to the problems of the students, and can enhance the learning process.

The old saying goes that communication is the key and education is no different. Ineffective communication skills can drastically hinder a teacher's ability to be fully effective. Students are the future of every nation. That is why the role of teachers is so important to the society. Overall improvement in a student can be expected when communication skills for teachers is given due importance.

This workshop focuses on the following aspects

1. To orient about the user friendly methods of developing English communication skills,
2. To orient on the availability of open educational resources for developing English communication skills which are self learning in their approach,
3. To help the participants to develop indigenous strategies for training students in English communication skills
4. To provide training to the participants to enhance their own training skills for English communication.
